

Goods Issue to a Reservation

Use

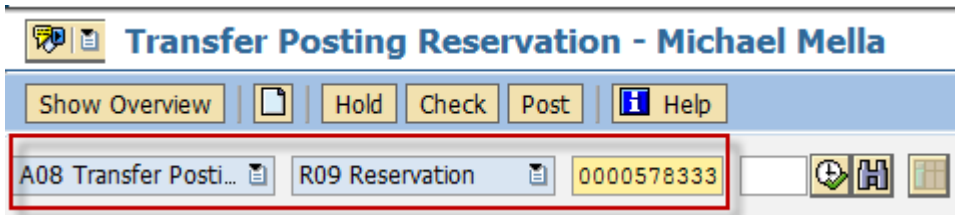

This activity is performed to transfer goods to another storage location with reference to a reservation.

Procedure

1. Access the transaction using any of the following navigation options:

SAP menu	<i>Logistics → Materials Management → Inventory Management → Goods Movement → MIGO</i>
Transaction code	<i>MIGO</i>

2. In the **MIGO screen**, choose **A08 Transfer Posting** and **R09 Other**. Enter the reservation number on the space provided next to it.

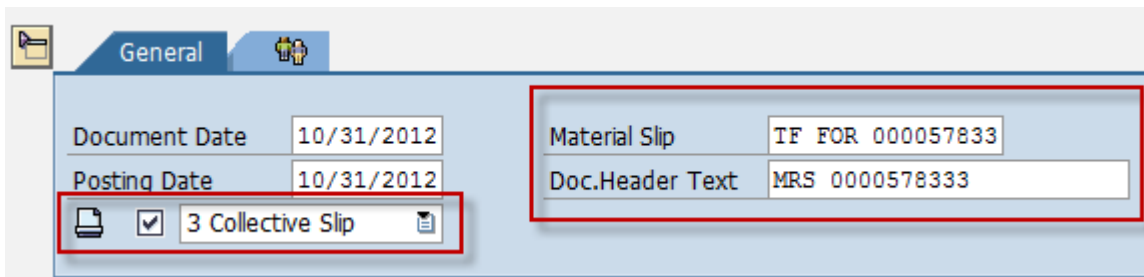

3. Make sure that the movement type at the rightmost part of the screen is **TF trfr within plant 311**. If not, type 311 in the field, then press **Enter**.

4. In the **General Tab Area**, make the following entries:

Field name	User action and values	Comment
<i>Material Slip</i>		Input is Required
<i>Doc. Header Text</i>		Input is Required
	Tick Box - Checked	Choose 3 – Collective Slip

5. In the **Transfer Posting Area**, choose **Transfer Posting** Tab and make the following entries:

Field name	User action and values	Comment
From		
<i>Material</i>	Issuing Material	Input is Required

<i>Plant</i>	Issuing Plant	Input is Required
<i>Stor. Loc.</i>	Issuing Storage Location	Input is Required
<i>Batch</i>	Issuing Batch	Input is Required
Dest		
<i>Stor. Loc.</i>	Receiving Storage Location	Input is Required
<i>Batch</i>	Receiving Batch	Input is Required
<i>Unit of Entry</i>	Quantity to be transferred	Input is Required

The screenshot shows the SAP Transfer Posting dialog box with the following details:

- From:**
 - Material: Garlic
 - Plant: Valenzuela 2 (P2)
 - Stor. Loc.: Cannq Processing 0065
 - Batch: (empty)
 - Spec.Stock: (checkbox unchecked)
- Dest:**
 - Material: Garlic
 - Plant: Valenzuela 2 (P2)
 - Stor. Loc.: Cannq Ret & Lbl 0066
 - Batch: (empty)
- Unit of Entry:** 10 KG

6. Tick Item OK.

The screenshot shows the footer of the SAP dialog box. The 'Item OK' checkbox is highlighted with a red box. Other elements include 'Line 1' and various icons.

7. Click button.

8. A dialog box appears containing system messages. Confirm warning messages. An error message will prevent you from posting the document.

9. Confirm messages by pressing Enter.

10. Save or Post .

Result

1. A material document is created.

Material document 4901633935 posted

2. The Unrestricted stock (quantity) of the issuing sloc. of the material will be decreased and will be moved to the new sloc.

If you want to reverse the transfer, follow the same steps above using the Movement Type **312**.
